🚗 Code 10

Profile Summary

Software Developer Intern with a Diploma in IT (Software Development, NQF 6) from Central University of Technology. Built 10+ production style projects across mobile, web, and API domains using C#, ASP.NET, JavaScript, and Flutter. Led a 5 person WIL development team, coordinating Agile sprints and ensuring on time delivery. CCNA-certified with a solid understanding of networking and security. Seeking a junior developer role where I can contribute immediately and grow fast.

Education

Central University of Technology, Bloemfontein, Free State

Diploma in Information Technology – Software Development (NQF 6)

2023 - 2025

Relevant Courses: Data Structures, Web Development, Object-Oriented Programming, Database Management, Android Mobile Development

Professional Experience

Software Developer Intern

SITA SOC(Ltd)

05/2026 – Current

- Developing and maintaining software applications and web-based solutions as part of a collaborative development team.
- Building backend applications and APIs using technologies such as C#, ASP.NET Core, Java, and related development tools, while following software development best practices.
- Participating in the full Software Development Life Cycle (SDLC), including requirements analysis, development, testing, debugging, and deployment support.
- Writing clean, maintainable, and well-structured code while following coding standards and development guidelines.
- Participating in code reviews, knowledge-sharing sessions, and technical discussions to improve development skills and software quality.
- Continuously learning and applying new technologies.

Team Leader – Work Integrated Learning (WIL)

Central University of Technology – Software Development

06/2025 – 11/2025

- Led a team of 5 developers through full SDLC delivery, coordinating sprint planning and code reviews to meet all 2 project milestones on schedule.
- Architected and built software solutions using C#, ASP.NET, and Firebase, applying clean code principles and MVC separation of concerns.
- Ensured adherence to project requirements, deadlines, and coding standards.
- Served as primary liaison between team members and academic supervisors, resolving blockers and keeping the project on track.

Technical Skills

Languages: C#, PHP, JavaScript, Flutter, Bash (Linux), SQL

Frameworks / Web Tech: ASP.NET, React.js, Node.js, HTML5, CSS3, CodeIgniter 4

Databases: SQL Server, MySQL, Firebase

Cloud Platforms: Azure, Render, Netlify, and GitHub Pages

Tools & IDEs: Visual Studio 2022, VS Code, SSMS, Git, Figma, Swagger, Docker, PHP myAdmin

Concepts: OOP, REST APIs, MVC Architecture, SDLC, Agile/Scrum, Clean Architecture, Repository Pattern, Dependency Injection

Projects

Employee Verification Mobile App | Flutter, Firebase | Github

- Built a full mobile employee verification system with registration, document upload, and real-time request status tracking for approvers and employees.
- Integrated Firebase Authentication, Cloud Firestore, and Firebase Storage, ensuring secure, role-based data access and persistent document handling.
- Implemented camera capture and image upload features, delivering a seamless onboarding UX from within the app.

HotelBookingAPI | C#, ASP.NET Web API, SQL Server | Github

- Designed and built a fully featured RESTful Hotel Booking API supporting room availability queries, reservations, filtering, and user management.
- Applied clean architecture with DTOs, repository pattern, and dependency injection making the codebase modular, testable, and maintainable.
- Implemented input validation, structured error handling, and standardized API response formats, documented via Swagger.

AI Personal Assistant Chatbot | JavaScript, HTML, CSS | Github

- Built an interactive chatbot capable of real-time responses through DOM manipulation and modular JS functions.
- Optimized performance for smooth UI interaction and scalability.

TravelPlanner Web Application | C#, ASP.NET MVC, SQL Server | Github

- Built a travel destination planning system with search, filtering, destination pages, and image galleries.
- Implemented MVC architecture with strong separation of concerns and reusable components.
- Integrated database storage for destinations, categories, and location metadata.

Certifications

- Microsoft Azure Developer -2026
- Microsoft Azure Fundamentals – 2026
- Cisco Certified Network Associate (CCNA) – 2023
- CyberOps Associate – 2022

Additional Highlights

- Strong collaboration, adaptability, and problem-solving skills.
- Experienced in version control and collaborative workflows using Git & GitHub.
